## The Laurie Todd Foundation Needs You!

Laurie Todd died very suddenly in 2018 aged 69 from Oesophageal cancer, tragically only 6 weeks after his diagnosis. Laurie was an active member of Roehampton Club for more than 30 years, so will be known to many of you. In his memory, **The Laurie Todd Foundation** has been set up by his wife Maundy, to fund research to aid the early diagnosis of oesophageal cancer, an increasingly common and difficult to treat cancer.

A 3-year pioneering local research programme has already started with a dynamic partnership between Kingston University and Kingston Hospital. The team are investigating the role of Human Papilloma Virus (HPV) in the development of Oesophageal cancer. The research is going really well but we need YOUR help to finance the 3rd and final year of this research programme and change the outcome of people diagnosed with this disease.
